### Objective or Professional Statement

Seasoned Software testing professional seeking a position where I can maximize my 8+ years of experience in software testing, management, quality assurance, program development, and training experience.

### Profile Summary

- Design software testing plans to evaluate functional and non-functional specification requirements for various test levels and types of information systems and technologies.
- 8+ years of experience in testing mobile and tablet devices and mobile applications on Android platform,
- Extensive experience and proficiency in testing methods.
- Sound knowledge in testing Web and Mobile applications and proficient in designing & executing test cases.
- Adept in writing test plans, defining test cases, developing and maintaining test scripts, analyzing the results of scripts, interaction with developers in fixing the errors.
- Good knowledge with API testing using Postman and Rest Assured.

### Testing Methods

Smoke	Sanity	Regression	Writing test cases
Defect reporting	Identify test scenarios	Test plan	

### Technical Skills

Automation Tool	Appium, Selenium WebDriver, Rest Assured
Programming Languages	Java, C#, Python
API s, Frameworks and other Tools	TestNG, Maven, Jenkins, Cucumber, Postman, Git
Defect Tracking Tools	HP Quality Center, Jira, Mantis, Bugzilla

### Education

#### Software Quality Assurance and Test Engineering

2020-2021

Post Graduate Certificate

Conestoga College, Waterloo, ON

This program focuses on understanding testing paradigms, methodologies and tools utilized throughout the software development process.

Program Highlights Include:

- High quality software programming.
- Software testing tools
- Software testing methodologies.

#### Bachelor of Science, IT Major

2013

Kuvempu University, Karnataka, India

#### Computer Engineering Diploma

2009

Nettur Technical Training Foundation, Kerala, India

### Professional Summary / Work Experience

Company	Position	Duration
Borqs Software Solutions	Tech Lead	Oct-2019 to Mar-2020
MarquisTech[Client Borqs]	Senior Test Engineer	June-2019 to Sep-2019
Borqs Software Solutions	Senior Engineer	Mar-2016 to Dec-2018
Alten Calsoft Labs [Client Borqs]	Senior Software Engineer-Test	June-2014 to Feb-2016
LGSoft India	Test Engineer	Sep-2010 to Dec-2013

## **Projects**

### **Project Name:** Emblem

Description: An android based low end smart phone targeted to AT&T customers.

Company: Borqs Software Solutions, Bangalore, India

- Perform Regression test on daily build.
- Automating test case in existing framework using Appium.
- Assigning tasks to team members and send daily status report to onsite.

### **Project Name:** Razor

Description: Android based high performance mobile device indented for high-end gaming users.

Company: Borqs Software Solutions, Bangalore, India

- Designed and implemented framework for mobile app using Appium with TestNG
- Involved in verifying the automation result and raise a defect if it is required
- Update the daily and weekly status to Onsite team and Managers.
- Designing test case according to requirements of newly added functionality.
- Mentoring new hires.

### **Project Name:** Blackberry

Description: Android based smart phone specifically designed with high security features.

Company: Borqs Software Solutions, Bangalore, India

- Perform sanity test on daily build.
- Participated in reviewing product requirements, functional and design specifications to determine and prepare test cases.
- Perform device update by using fota packages.

### **Project Name:** CloudMinds

Description: Android based smart phone designed for Red company, for multimedia users.

Company: Borqs Software Solutions, Bangalore, India

- Wrote regression test cases for the fixes and changes as per the release note.
- Interact with client at onsite and help to complete AT&T certification.
- Testing 3<sup>rd</sup> party apps integrated by AT&T.

### **Project name:** Lenovo

Description: A 7-inch android-based tablet.

Company: Borqs Software Solutions, Bangalore, India

- Functionality testing Lenovo tablet.
- Verifying AT&T customization.
- Testing hardware performance for Display, memory and Storage.
- Interact with client at onsite and help to complete AT&T certification.

### **Project Name:** Vizio

Description: An Android based smart TV, targeted to US customers.

Company: Borqs Software Solutions, Bangalore, India

- Testing of TV remote functionality based on Android tablet.
- Verifying Bluetooth LE functionality for the connection between TV and Tablet.

### **Project Name:** Mobile testing [Product Validation Group]

**Client:** In-House [Different LG mobiles]

Company: LG Soft India, Bangalore, India

- Various project involves testing of 2G/3G LG handsets from different platform & OS. Which are released in the ESA, MEA, EUROPE and US region.
- Involved in Smoke, Sanity, Feature, Regression and Performance testing.
- Verify different network bands like GSM800, 1800 etc. using Agilent tool.
